## **2. Signs and Markers**

Mine identification signs are located at the points of public access to the permit area. The signs contain the required information.

### **4.a Hydrologic Balance: Diversions**

LeLand Roberts, SUFCO, notified the Division the week prior to this inspection that an internal inspection revealed that the undisturbed bypass culvert system has a segment that has partially collapsed. The segment lays beneath the area by the coal storage pile and fuel storage area. Arrangements were made and an additional fuel storage tank with containment is on site to allow the area to be excavated and the CMP to be repaired.

## **7. Coal Mine Waste, Refuse Piles, Impoundments**

The refuse pile had a light coating of snow over the entire pile from the snow storm that was occurring during the inspection. The pile appeared stable.
